Booty builder V8

The Booty Builder® V8 is our latest innovation. It is built on experience from our seven previous models. BB V8 is totally redesigned. It takes less space and footprint than our previous models. Easier to adjust and faster setup! Booty Builder makes hip-thrusting safer, faster and more effective. The patented raised feet design puts you in the ultimate position to isolate the glutes.

Booty Builder has a wide range of users. From gym members wanting strong glutes, medical facilities and professional sporting teams. People are realizing the importance of glute activation for physical function, strength and performance. Add the BootyBuilder bands for extra resistance and explosive movement required for sports performance.

Bootybulider Platinum V4

Booty Builder® PLATINUM is our new and innovative plate loaded machine, which makes hip-thrusting safe, easy and fun, on a minimal footprint. Booty Builder Platinum provides the ultimate glute workout with its patented raised feet design allowing for a deeper range of movement and constant resistance for better results.

The cushioned seatbelt design adds extra comfort so you can load up heavy weight. Add the BootyBuilder bands for extra resistance and explosive movement required for sports performance. Linear bearing seat rollers makes Platinum easy to adjust to suit all sizes.

TRANSPORTATION Delivered in a wooden box almost fully assembled

RESISTANCE LEVEL 7 kg / 15 lbs (without weights)

MAX TOTAL LOAD 200 kg / 441 lbs

Booty builder V-squat

The V squat machine allows for a more targeted activation of the quadriceps, glutes, and hamstrings, which can lead to better muscle development and strength gains. V squats are rather low-impact, and allow lifters to place less stress on their knees and hips, thereby reducing the risk of chronic overuse injuries and developing symptoms of discomfort.

Compared to traditional barbell squats, the V squat machine can help reduce the stress on the lower back. This can be beneficial for individuals who have lower back issues or who are recovering from an injury. The V squat machine allows for a more controlled and stable movement, which can be beneficial for individuals who are new to strength training or who need to work on their form.

ASSEMBLY SIZE	L 1990 × W 1625 × H 1271 mm / L 79" × W 64" × H 51"
	inches
NET WEIGHT	235 kg / 519 lbs
SHIPPING DIMENSIONS	1 pallet = 120 x 80 x 200cm / 48" x 32" x 78" inches
SHIPPING WEIGHT	300 kg / 662 lbs
RESISTANCE LEVEL	30kg / 66 lbs (without weights)

Booty builder selectorized back extension

The BB back extension eliminates the struggle gripping weight plates / kettle bells for added resistance, when performing the hyperextension exercise.

The Selectorized Back Extension machine, allows you to conveniently hold onto a barebell for the added resistance, and avoids weights being dropped to the floor.

The multiple height adjustments is ideal for any user, it helps you target anywhere between hamstrings / glutes and lower back.

With dual usage, it can also be used for leg swing exercises with ankle strap attachment. You can adjust the height of the handle bars to suit the user for stability during the exercise.

Booty Builder Dual Hip Thrust

Booty Builder Station Dual Hip Thrust is a must for every gym as it provides a dedicated area on the training floor for those wanting to do one of the most popular exercises today in the gym, that being barbell hip thrust.

Booty Builder Dual Hip Thrust offers the best of both worlds! Its patented raised feet design has you thrusting directly upwards to isolate the glutes and hamstrings and taking the dominant quads out of the movement as well as providing a deeper range of movement for better results. Or you can easily slide the foot platform out of the way on its linear bearing rails for your traditional barbell hip thrust with feet on the ground to work a different range of muscles. With its relocatable band pegs the Station 2.0 can also be used for 100's of resistance band exercises, both upper and lower body. The resistance band hip thrust is not only more comfortable and easier to set up than traditional barbell hip thrust, with the added top end resistance when using resistance bands you can get the ultimate glute burn.

ASSEMBLY SIZE	L 1880 × W 838 × H 533 mm / L 74" × W 33" × H 21" inches
ASSEMBLED WEIGHT	130 kg / 285 lbs
